

## [The Clairvoyant in the Field of Vision of KGB: "This is All the Influence of Kustov"](#)

Published: 23.10.2018

**"It is difficult to explain what cannot be understood by the academics of science for hundreds of years"**

During the conversations of Lev Kolodny with the generals of the Ministry of Defense, KGB, FSB and Federal Guard Service (FSO) published by MK they talked about the declassified program which military unit 10003 of the General Staff and other closed institutions had engaged in for fifteen years. The military people had examined the people with inexplicable abilities not only to heal, but to transmit thoughts to distances, predict the future... They can affect the situation and behavior of people, prevent danger, find criminals. The interlocutors of MK repeatedly and with gratitude mentioned the name of Valery Kustov. The time has come to let him speak.

Valery Kustov by the picture presented by Juna.

Lev Kolodny:

**Valery, I was told that you had been examined not only by military people, but also by the Institute of Radio Technologies and Electronics of the**

**Academy of Science of the USSR, where Juna had been in service. For three years I have been accompanying her to the laboratory managed by academic Gulyaev and professor Godik in Starosadsky lane. But I have never seen you there.**

Valery Kustov:

I will explain why. I would come to the laboratory of Gulyaev-Godik accompanied by the employees of competent authorities. It was often so that I sat in the arm-chair which was just left by Juna Davitashvili. But we were not allowed to converse. We met each other many years later, when the program with my participation was declassified. I was asked to maintain her health, in the course of treatment we became friends, as a remembrance she wrote an opinion which is dear to me: "Valery Kustov is the only specialist whom I allowed approaching me. He is a very strong healer and while treating he demonstrates real results. When he treats, I feel his bioenergetic influence. Valery is a genius of his work along with being a kind, cheerful man. I wish him to help people for many years!"

She was a talented person in many fields, but behind the laboratory walls she devoted her whole self to healing. I have this gift, but I was employed to solve many other tasks..."

Lev Kolodny:

**Before we hear about them, tell us about yourself: how it started, what made you engage in the things which many consider in the best case as infusion, mistake of the journalists?**

Valery Kustov:

I was born in Nalchik in 1949. When I was two years old, I overcame an apparent death due to the nurse's mistake who administered a wrong drug. Many years later

lieutenant general Aleksey Savin said that probably at this moment I had gained my abilities. Gradually everything normalized, I became a merry, active child.

Lev Kolodny:

**As far as I know, an apparent death, grave malady awoke the phenomenal abilities of Ninel Kulagina who also became an object of study in the laboratory of Gulyaev-Godik. When did you start to feel that you have an inexplicable gift able to surprise people?**

Valery Kustov:

The first unusual phenomena began happening to me from around 14 years old. If some familiar person became ill, I somehow knew if he will recover. If not, I could tell the approximate date of death. My relatives began paying attention to the fact that my touch causes sparks and tingling as if from static electricity. Moreover, nothing similar happened to other people in the same conditions. A day before my first entrance examination to the institute my distant relative proposed predicting my fate. I answered that I did not believe anything like that. But she, having spread the Tarot cards, said: "You may not go to the examination tomorrow – you will fail it anyway. But later you will enter a correspondence department and study long. Not because learning is difficult for you, but because you will help people. Everything happened exactly so as had been predicted: I was not able to solve a math task, which I did solve before – I was stuck! And I believed that my life path had been predetermined. Further on there were still many other signs which confirmed this.

Lev Kolodny:

**How did you get into the field of vision of special services – did you propose your services yourself?**

Valery Kustov:

Certainly not. During the session in the institute, when I took an examination, I suddenly saw my teacher wearing the uniform of major, although he wore a suit. I stumbled and said: "I see the uniform of major. Did you put it on yesterday?" The teacher shuddered and answered curtly that he had never been a military man. On the next day my aunt who had connections with KGB, warned me: "Did you do anything? They placed you under surveillance around the clock and record all contacts and talks! Be careful and do not say all things." As it turned out, the teacher was in service with KGB, he gained a major rank and one day before the examination he put on a new uniform with shoulder straps for making a picture for the certificate...

When I began working according to my specialty, I demonstrated an ability to treat people. By simple movement of hands without touching the body I relieved the pains of an employee who suffered systematic lupus erythematosus. Later she bore a healthy child.

Lev Kolodny:

**Valery, I came to know many things about healing, no contact massage from Juna – I would like to hear about your secret service...**

Valery Kustov:

Rumors about my treatment spread in small Volgodonsk where I lived at the time with my family. KGB and other enforcement structures found out about me. They began involving me in investigations of criminal offenses, industrial espionage. The employees of special services are also people and get ill, I treated them... The results of my work astonished them so much that they decided to study my abilities in the Rostov medical institute. The inspection lasted several months under control of the head of KGB regional department lieutenant general Aleksey Khlestkov whom I met daily.

In 1982 I was given a document which says that my abilities have been confirmed in the course of comprehensive experiments, they have produced real results. I gained recognition of the medical community with the official right to treat, I began receiving the patients in the polyclinic.

Lev Kolodny:

**At about the same time they began studying Juna officially but she was taken care of by physicists, and you became the KGB's object not only as a healer...**

Valery Kustov:

The employees of special services, having believed in me, began systematically employing me in disclosing grave crimes. I saw and described to them how everything happened, what criminals and victims looked like and what evidence could be found... In most cases my descriptions helped disclose the crimes, and sometimes prevent the crimes. There were many cases, they all resemble each other... Major general Nilolay Sham, former first deputy of KGB chairman of the USSR, have recently told you about them in MK.

I had a very important work at the Rostov nuclear power plant due to its nearness to Caucasus, where the war went on. Plant director Vladimir Pogorely, according to recommendations of local special services, invited me to become his advisor for

information safety. I found several defects of equipment which might have led to emergencies of various degrees of severity. The most serious out of them was a defect in the turbine generator blade which might have led to a catastrophe compared to the Chernobyl one. It could not be practically discovered without a special examination, which was not planned, but was conducted after my instruction. According to my evaluations this defect of the turbine generator was an intentional act of diversion and terrorism. The case was submitted to special services, and the investigation was classified. The Rostov nuclear power plant awarded me a gratitude certificate of honor for this work.

One day our plant was visited by deputy director of the South Ukrainian nuclear power plant Leonid Korchagin. Our director Pogorely asked me to evaluate the current situation of reliability of his plant. I "shot" the information and said that within 10 days after Korchagin returns to the South Ukrainian nuclear power plant there would be an emergency on the third power generation unit and at the specific place during the change of shift in which an engineer would work whose name was associated with spectacles (Russian:очки, «АЧКИ»). To prevent the emergency I recommended this employee be sent to vacation. Korchagin surprisingly noted that engineer Achkasov actually worked in the third power generation unit. But the surprise was not sufficient: they did not follow my recommendation at the plant. As a result the plug was blown off on the 7<sup>th</sup> day at the place specified by me, which led to the shutdown of the power generation unit at the South Ukrainian nuclear power plant. Engineer Achkasov did work in this shift. He was not to blame, but his absence could have changed the configuration of the information field at the time of emergency and prevented it. Korchagin invited me to the South Ukrainian nuclear power plant to analyze the plant safety...

Lev Kolodny:

**Valery Valentinovich, can you affect the natural phenomena, about that I was told by Juna, but I did not believe it very much?**

Valery Kustov:

I can tell you about the visit of Adamov, the head of the Ministry of atomic energy to our nuclear plant. When his helicopter approached the Rostov nuclear power plant, there was a severe snowstorm, the pilot could not land and was circling in the air for over an hour. Then Pogorely found me by making a phone call to the other city and asked me to ensure helicopter landing. I made a program being at a distance of over 300 km. In 20 minutes the snowstorm subsided, the helicopter landed, the meeting took place, and after departure of Adamov the snowstorm resumed. There were many cases like this...

Lev Kolodny:

**You did not limit yourself to working in Rostov-on-Don. How did you find yourself in the field of vision of the special services of the USSR?**

Valery Kustov:

They reported on me to the central staff, and I was called to Moscow where in 1984 I met Nikolay Sham and then other generals and senior officers of KGB, Ministry of Internal Affairs and General Staff. The collaboration with the main echelon of special services commenced. This meant for me regular trips to Moscow and other cities. They called me from different ministries, and sometimes from the Central Committee of the Communist Party of the Soviet Union and government. My abilities

were examined in the Institute of Aviation and Space Medicine and many other corresponding institutions of Moscow. One day, as soon as the experiment started, all electronic equipment of the laboratory of the Brain Institute switched off. The scientists explained to us that they had a very sensitive equipment: apparently, outburst on the Sun occurred, and the equipment reacted. The officer who accompanied me answered to this: "This all is the influence of Kustov" We left – the equipment began working immediately. The same thing happened on the next day. It dawned even on the skeptics that outbursts on the Sun could not occur by order exactly at the same moment when the experiment on me began at the station. The scientists said that their equipment could not withstand such force of influence, - I was sent to experiments in the other division.

Lev Kolodny:

**You often say: "made a program", "modeled a program" – what sense do you put to these mysterious words?"**

Valery Kustov:

It is difficult to explain what cannot be understood by the academies of science for hundreds of years. Along with the analysis of situations I do not only engage in forecasting and planning of actions and their results. I mentally see the images and events arising in the information field which is not subject to measurement as an electromagnetic field and other fields known to physicists. But this does not mean that you cannot affect it.

I try to help each person not only with respect to his health and business, but tune life, change the world outlook. I advise to businessmen, model the deals, if necessary, shoot the information about the progress and make corrections.

Lev Kolodny:

**Did you, as Juna, meet notable people and make friends with them?**

Valery Kustov:

Notable people often come to my office, later I make friends with many of them. But I cannot name them out of ethical consideration. There were many things in my life and the time has not yet come to tell about them... I am an object of regular examination even today. The data on the majority of projects in which I participated is still unclassified.
